Inhaltsverzeichnis

First Menu Screen

The //SmartEPGvu+ // menu can be accessed by pressing the menu key on the remote control when a view is open.

The menu can always be called up when one of the views is displayed.

Meaning of the individual keys actions when using the menu:

The currently installed version is displayed in the //SmartEPGvu+ // menu at the top right.

 Exit
closes the menu screen without saving. However, a query is displayed asking whether you really want to exit without saving.

 Save
The current setting is saved.

 Default values
All settings will be reset to default.

 Toggle
Settings that can be determined with a ✔ or ✖ can be selected or deselected with the OK key.

Each menu item can be changed with the right/left keys.

Meaning of the individual menu options:

- **Catch EPG/timer keys**

All keys pressed during an open //SmartEPGvu+ // screen are intercepted and only perform actions within //SmartEPGvu+ //.

- **Entries in main menu**

The three menu entries of //SmartEPGvu+ // are added to the VTi main menu, and the associated activities can be accessed using them.

* **Channel display in the timer view**

Here you can select what is displayed in the Timer view. There are the following options:

- The channel logo
- The channel name
- The channel number

* ** Channel view in the Overview view**

Here you can select what is displayed in the Overview view. There are the following options:

- The channel logo
- The channel name
- The channel number

* **Channel view in the Grid view**

Here you can select what is displayed in the Grid view. There are the following options:

- The channel logo
- The channel name
- The channel number

* **Channel display in the Next events view**

Here you can choose what is displayed in the Next events view. There are the following options:

- The channel logo
- The channel name
- The channel number

* **Recording file name**

Here you can select how the file name of the recording will appear in Media manager. These are the available options:

- VTi setting
- Name
- Name + Description
- Name + Time stamp
- Name + Description or time
- Name + Description + time
- Name + Time + description

If you have not selected „vu+ default values“ in a search or in the global settings, the recording will be renamed at the end of the recording. If a recording with the same name already exists, the newer one is given the suffix „-2“, „-3“, etc.

* **Show new timer**

Here you can specify whether new timers should be highlighted in dark green in the Timer view. These timers can then be confirmed in the Timer view with the  key.

* **Lost timer handling**

This deals with timers that point to an EPG entry that is no longer in the EPG database. This is usually because the broadcaster has rescheduled the show or cancelled it altogether.
The advantage of this option is that a recording at the specified time will still be performed.

* **Endless scrolling**

This feature allows endless scrolling through a screen when clicking the up/down key.

* **Cursor Position OV+Grid**

This defines where the cursor should be in the overview screen Overview view and in the Grid view (current channel or on first channel).
